THE EQUINE TOOTHBRUSH

## Every Horse should have one

### New Equine Toothbrush

We are pleased to announce the launch of an exciting new product to the equine world... The Equident Toothbrush.

This handmade purposefully designed brush will ensure that horses maintain healthy teeth and gums.

Regular visits by your equine dentist are a must for all horses but for the in-between times this brush is a great tool for all conscientious horse owners.

The Equident Toothbrush helps to dislodge packed feed stuck in the diastemas (gaps) between molars - pre molars and incisors to help stop the build up of tartar on canines.

Packed feed if left can lead to periodontal (gum) disease so it's up to you as owners to help reduce these risks as much as possible.

### The key benefits

- ★ Suitable for all horses
- ★ Easy to use
- ★ Easy to clean
- ★ Promotes healthy Teeth and Gums
- ★ Removes Tartar
- ★ Useful to remove packed feed from horses who have had major dental surgery
- ★ For horses with no dental problems
- ★ Can help prevent mouth discomfort
- ★ For Owners, Breeders, Equine Dental Technicians and Vets

### Think about it...

You brush your teeth twice a day, so why not your horse?

Even once a week can make a difference...
